

SWETHA KAMBHAMPATI

Bengaluru, India

+91-8951460897 — ks.kswetha09@gmail.com — [LinkedIn](#) — [GitHub](#)

Professional Summary

M.Tech Artificial Intelligence & Machine Learning student with 3+ years of industry experience at Wipro as an RPA Developer. Strong foundation in Machine Learning, Deep Learning, LLMs, and automation-driven AI solutions. Seeking roles in AI/ML, Deep Learning, and Large Language Models.

Education

M.Tech – Artificial Intelligence & Machine Learning

2025 – Present

VIT Vellore - LTIMindtree Sponsored Program

CGPA: 9.54

B.Tech – Electrical and Electronics Engineering

2017 – 2021

Acharya Institute of Technology, Bengaluru

CGPA: 7.9

Technical Skills

Programming Languages: Python, Java , SQL

ML & AI: Machine Learning, Deep Learning, NLP, Large Language Models (LLMs), Feature Engineering, Model Evaluation

Deep Learning & CV: CNN, RNN, LSTM, YOLO (Object Detection), OCR

Libraries & Frameworks: TensorFlow, PyTorch, Keras, Hugging Face (Transformers), Pandas, NumPy, Scikit-learn

Data & BI: Power BI, Excel, SQL Database, Apache Spark (academic)

Automation & Platforms: Power Automate, Power Apps, UiPath Orchestrator, AI Builder

Deployment & Integration: REST APIs, Edge Intelligence

Tools: Jupyter Notebook, SSMS (SQL Server Management Studio), ServiceNow, ABBYY FlexiCapture

Work Experience

Project Engineer

Sept 2021 – Oct 2024

Wipro, Bengaluru

- Designed and deployed enterprise automation solutions using Power Automate and Power Apps.
- Built and maintained RPA workflows for data processing, reporting, and system integrations.
- Collaborated with stakeholders to translate business requirements into scalable automation logic.
- Managed testing, deployment, monitoring, incident resolution, and SQL-based data validation.

Projects

• Hallucination-Aware LLM for Software Requirements Analysis (Ongoing)

Designing a fine-tuned LLM framework to analyze natural language software requirements with calibrated, explainable outputs. Focuses on reducing hallucinations, handling ambiguity, resolving false conflicts, and explicitly expressing uncertainty.

• Label Uncertainty Handling in Autonomous Driving using GenAI and XAI (Ongoing)

Developing a deep learning framework to address noisy and ambiguous labels in autonomous driving perception tasks using CNN-based models and explainable AI techniques for robustness and label refinement.

• Plant Disease Detection Using Aerial Imagery (Ongoing)

Built a CNN-based multi-label classification system for detecting multiple plant diseases from drone-acquired imagery, addressing class imbalance and overlapping disease patterns.

• Stock Market Prediction and Forecasting

Implemented ARIMA and ML-based time-series forecasting with data preprocessing, stationarity analysis, and performance evaluation.

• Automated Invoice Processing System

Developed an OCR-driven invoice extraction and ML-based classification pipeline integrated with Power Automate workflows.

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services
- Business Analytics – Indian Institute of Science (IISC)
